Overview

CPT: Pharmacometrics & Systems Pharmacology (PSP) is an official open access journal of the American Society for Clinical Pharmacology and Therapeutics (ASCP) and International Society of Pharmacometrics (ISoP).

CPT: Pharmacometrics & Systems Pharmacology is a cross-disciplinary journal devoted to publishing advances in quantitative (e.g., modeling and simulation) methods as applied in pharmacology, physiology and therapeutics in humans. The journal welcomes original research articles, reviews and tutorials that bridge the following areas: pharmacometrics, modeling and simulation as applied to the design and evaluation of clinical trials, systems pharmacology modeling, particularly with a mechanistic link to human (patho)physiology, disease modeling, "population" or mixed-effects pharmacokinetics and pharmacodynamics (PKPD) modeling, modeling and simulation to support translational research, physiologically-based pharmacokinetics (PBPK), model-based meta-analyses of clinical trials, mechanism-based pharmacokinetic-pharmacodynamic modeling, computational pharmacology, bioinformatics, comparative efficacy, effectiveness and cost-effectiveness. Systems pharmacology may involve the application of systems biology approaches to study drug activities, targets and effects. The discipline is often defined with reference to engineering and pharmacological principles as the quantitative analysis of the dynamic interactions between drugs and a biologic system that aims to understand the behavior of the system as a whole. The common focus will be on quantitative methods that improve our understanding of pharmacology and therapeutics in humans.

Society Information

The American Society for Clinical Pharmacology and Therapeutics (ASCPT) was founded in 1900, and consists of over 2,200 professionals whose primary interest is to advance the science and practice of clinical pharmacology and translational medicine for the therapeutic benefit of patients and society. ASCPT is the largest scientific and professional organization serving the disciplines of Clinical Pharmacology and Translational Medicine.

All articles published in this journal are freely available to read, download, and share. Articles are published under the terms of the Creative Commons Attribution Non-Commercial License which permits use, distribution, and reproduction in any medium, provided the original work is properly cited and is not used for commercial purposes.

Publisher

CPT: Pharmacometrics & Systems Pharmacology is published by Wiley Periodicals, Inc., 101 Station Landing, Suite 300, Medford, MA 02155; Telephone: 781-388-8200; Fax: 781-388-8210.

CPT: Pharmacometrics & Systems Pharmacology

TUTORIAL

TUTORIALS

- 525** NONMEM Tutorial Part I: Description of Commands and Options, With Simple Examples of Population Analysis
Robert J. Bauer
- 538** NONMEM Tutorial Part II: Estimation Methods and Advanced Examples
Robert J. Bauer
- 557** ATLAS mPBPK: A MATLAB-Based Tool for Modeling and Simulation of Minimal Physiologically-Based Pharmacokinetic Models
Panteleimon D. Mavroudis, Vivaswath S. Ayyar and William J. Jusko

RESEARCH

ARTICLES

- 567** Physiologically-Based Pharmacokinetic Modeling for the Prediction of CYP2D6-Mediated Gene–Drug–Drug Interactions
Flavia Storelli, Jules Desmeules and Youssef Daali
- 577** Optimal Scheduling of Bevacizumab and Pemetrexed/Cisplatin Dosing in Non-Small Cell Lung Cancer
Benjamin K. Schneider, Arnaud Boyer, Joseph Ciccolini, Fabrice Barlesi, Kenneth Wang, Sebastien Benzekry and Jonathan P. Moche
- 587** A Minimal Physiologically-Based Pharmacokinetic Model for Tacrolimus in Living-Donor Liver Transplantation: Perspectives Related to Liver Regeneration and the *cytochrome P450 3A5 (CYP3A5)* Genotype
Kotaro Itohara, Ikuko Yano, Tetsunori Tsuzuki, Miwa Uesugi, Shunsaku Nakagawa, Atsushi Yonezawa, Hideaki Okajima, Toshimi Kaido, Shinji Uemoto and Kazuo Matsubara
- 596** Development of a Parsimonious Design for Optimal Classification of Exclusive Breastfeeding
Zheng Liu, Aly Diana, Christine Slater, Thomas Preston, Rosalind S. Gibson, Lisa Houghton and Stephen B. Duffull
- 606** Time-to-Event Modeling of Peripheral Neuropathy: Platform Analysis of Eight Valine-Citrulline-Monomethylauristatin E Antibody–Drug Conjugates
Matts Kågedal, Divya Samineni, William R. Gillespie, Dan Lu, Bernard M. Fine, Sandhya Girish, Chunze Li and Jin Y. Jin
